

You've been identified as a close contact of someone who has tested positive for COVID-19 or someone with COVID-19 symptoms and you work in a highest risk setting.* Now what?

• Self-isolate immediately for 10 days from your last exposure and until you have no fever and other symptoms are improving for 24 hours (or 48 hours for gastrointestinal symptoms).

No

- Get tested as soon as possible.
- Notify your employer and follow any work restrictions and early clearance guidance.

- <u>Self-monitor</u> for symptoms for 10 days.**
- If you are immunocompromised you should self-isolate for at least 10 days from your last exposure and until you have no fever and other symptoms are improving for 24 hours (or 48 hours for gastrointestinal symptoms).

Yes

- Get tested if recommended by the public health unit.
- If your test is **positive** you must self-isolate. Follow the guidance for cases.
- You should **NOT** attend work for 10 days from your last exposure.
- Report your exposure to your employer and follow any work restrictions. If there is a critical staff shortage, you may be able to attend work under work-self isolation.
- If you develop any <u>symptoms</u>, get tested as soon as possible and <u>self-isolate</u> until you get your result.

- <u>Self-isolate</u> for the same amount of time as the positive/symptomatic person.**
- You should NOT attend work for 10 days from your last exposure.
- Notify your employer and follow any work restrictions If there is a critical staff shortage, you may be able to attend work under workself isolation.
- If you develop <u>symptoms</u>, get tested and follow the guidance for cases.

^{*}Highest risk settings include hospitals (including complex continuing care facilities and paramedic services) and congregate living settings, including Long-Term Care, retirement homes, First Nation elder care lodges, group homes, shelters, hospices, and correctional institutions.

^{**}Wear a well-fitted mask in public, physical distance and maintain other public health measures for 10 days following your last exposure if leaving home. You should **NOT** visit any highest risk settings* or individuals who may be at higher risk of illness (i.e. seniors or immunocompromised) for 10 days from your last exposure.
